

MTI Installer and update service summary

(Team: Vinay Dwivedi, Valerio de Angelis, Martin J Pattison)

January 16, 2006

(MetaHeuristics Internal Report No. **MH02-MTI-001**)

MTI is seeking a solution that allows for quick installation and update of their software, PROWIN. PROWIN runs on dedicated computers installed in the licensee offices as part of the licensing agreement. The PROWIN software was initially developed in VISUAL FORTRAN and VISUAL C++. Over time, additional modules have been added to the base software to build a commercially viable solution.

The following components have been developed by MetaHeuristics for the MTI's installer and update service.

- 3.1 SQL Server Tables
- 3.2 Server Side Application
- 3.3 Client Side Service
- 3.4 InstallShield Installer
- 3.5 Registry Key entries
- 3.6 Server Side Web Interface
